Xinhua reported Ru Chi

ZyXEL Control (3704) s 5 ZyXEL announced in the U.S. health care industry MyGlucoHealth strategic alliance, ZyXEL will provide MyGlucoHealth simplify data network transmission solutions, to remotely monitor patients with the disease; ZyXEL will provide Smart Home Gateway (SHG) action routers, Bluetooth with partnerships

glucose meter, you can monitor blood glucose on the network to reach remote care goals.

ZyXEL research and development of Smart Home Gateway (SHG) action router, so that patients can upload data to MyGlucoHealth site, the middle does not need any mobile phone, or computer network.

MyGlucoHealth American Telemedicine electronic management vendors to provide comprehensive care for the chronically Solutions, the company's aim is to enhance the personal care and treatment of chronic diseases, while at the same time reduce the patient and the financial burden of health care organizations. MyGlucoHealth want to increase patient and clinical communication between physicians and nurses to improve the quality of care; its partners have a mobile phone factory of Nokia (Nokia), Australia's Telstra and other telecommunications operators, and network applications, ZyXEL is the first Networking a partner.

ZyXEL's Smart Home Gateway (SHG) has a 3G/4G mobile router, network, and through the Bluetooth wireless transmission, copied from MyGlucoHealth detection equipment in medical data, and then immediately transfer data to MyGlucoHealth database.

SHG through the ZyXEL device, allowing patients into active participation in the management of their condition, and take the initiative to respond to medical data MyGlucoHealth, to management of diabetes, the purpose of a better life, so ZyXEL's networking solutions that can improve medical care quality, and any monitoring of blood glucose, reduce the frequency of doctor.
