MyGlucoHealth Wireless Integrates With New 2Net™ Hub from Qualcomm Life

MyGlucoHealth Wireless blood glucose meter is fully integrated with the New 2net™ Platform from Qualcomm Life. The 2Net Hub allows MyGlucoHealth to provide a stand-alone home monitoring solution for assisted living, caregiver monitoring, home monitoring devices as well as in diabetes-based fitness centers, hospitals and clinics.

The MyGlucoHealth Wireless meter offers Bluetooth transmission of blood glucose test results to a patient's secure online electronic journal. Test data can be automatically integrated with a patient's electronic health record (EHR) or personal health record (PHR) to streamline clinical workflow and alert clinicians of potential issues. Persons with diabetes, clinicians and caregivers can also access test data through a mobile phone or the Web.

Entra Health will offer MyGlucoHealth Wireless meters integrated with Qualcomm Life's 2Net Hub beginning in first quarter of 2012 online at www.myglucohealthstore.com.

2net™

by Qualcomm Life

The 2net™ Hub (FDA-listed as a Class I MDDS) from Qualcomm Life is a new wireless health solution that can elegantly and reliably capture and deliver data from the MyGlucoHealth Wireless Meter to a cloud-based portal using Qualcomm's securely designed platform. 2Net is backed by the credibility, skill and know-how that come with more than 20 years of Qualcomm Incorporated's wireless industry leadership and the global interoperability to enable unified machine to machine (M2M) communications.
